

2024 ADVISEMENT

KEY RESULT AREA: Swine Health

ADVISEMENT NUMBER: 2024– A5

SUBMITTED BY: Minnesota Pork Board

SUBJECT MATTER: National Disease Indemnity Program

MOTION: The National Pork Board in collaboration with interested parties, continues to work towards establishing a clear, concise, and properly designed Foreign Animal Disease indemnity program that addresses current gaps in federal programs for Foreign Animal Disease responses.

Passed

Rationale:

It is critical to both the future of the U.S. pork industry and FAD response planning that producers have confidence in the indemnity structure and are aware of how valuation and payment policies will work before an outbreak occurs. Ensuring that indemnity programs are clear, concise, and properly designed will allow pork producers to be fairly indemnified without added uncertainty following an outbreak.
